YOUYUE RUBBER

COMPANY PROFILE

PROFESSIONAL PCR TIRE MANUFACTURER

Shandong YouYue Rubber Technology Co., Ltd. is located in Zhucheng City, Weifang. It has a superior geographical location and is close to Qingdao Port.

The company is a high-tech industrial group focusing on the research and development, production, sales and foreign trade of semi-steel radial tires and related supporting products. In terms of quality control, the company has passed a number of strict certifications which fully reflects the company's high attention and strict requirements for product quality.

Relying on advanced technology and a professional team, the company is committed to providing customers with high-quality semi-steel radial tire products. In the research and development link, continuous resources are invested in innovation to meet the needs of different markets and customers. In the production process, advanced production processes and equipment are adopted to ensure the stability and reliability of products. In terms of sales and foreign trade, it actively expands domestic and foreign markets and has won wide acclaim from customers with high-quality products and services.

LABELING DESIGN

AS THE MOST IMPORTANT PROMOTIONAL PART OF A TIRE, THE TIRE LABEL,

after we conducted thorough market research and comparisons, incorporates the design concept of YOUYUE's product patterns. Moreover, it has undergone bold innovation and conceptualization in response to the current demand of a younger user group. Visually, it can directly catch people's attention at first glance, and the label structure of the brand forms a distinct contrast. A carefully crafted and excellent label design can be of great help to sales. Through the reasonable combination of various geometric shapes, it not only appears more upscale but also facilitates the differentiation in the warehouse.

Additionally, YOUYUE has carefully placed the "Size" Pattern name" Load&-speed rate" in two different positions, making it more readable and convenient for management.

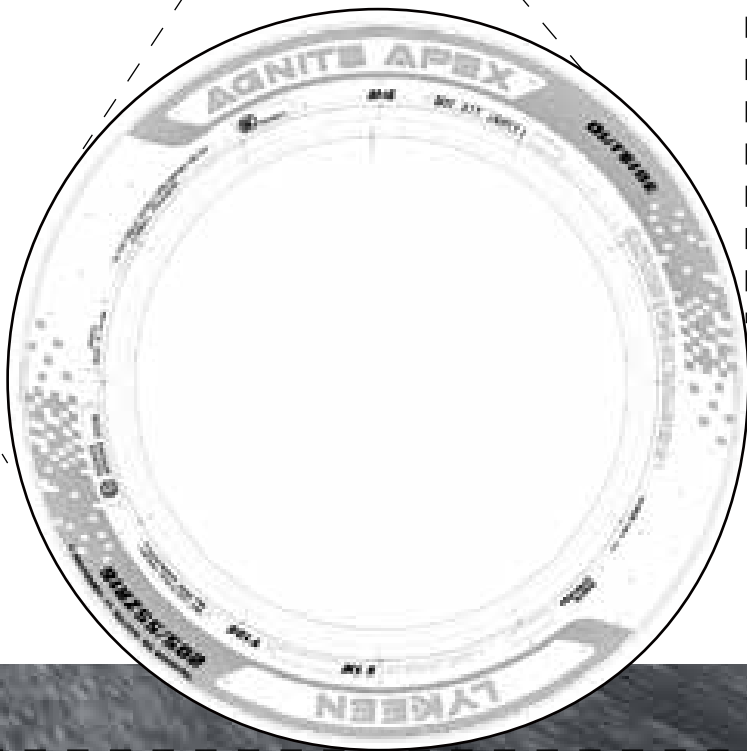

SIDE WALL DESIGN

AGNITE APEX
LUMIRA ELITA
LUMIRA 4season
VANTOYAR

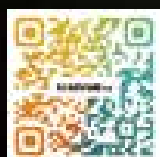

The R&D department of YOUYUE has also designed the sidewalls of each tire series. The overall design is more aesthetically pleasing and better in line with the public's aesthetic taste. At the same time, the font of the pattern name has been designed by a professional advertising company (with exclusive copyright).

PERFORMANCE RATINGS

WET PERFORMANCE:  7

DRY PERFORMANCE:  7

COMFORT:  8

NOISE ABSORPTION:  8

TREAD LIFE:  6

- **Quiet, safe, energy-saving, and environmentally friendly**

Designed for medium and high-end sedans. It offers exceptional comfort and remarkable noise reduction. At the same time, it excels in wetland handling and demonstrates outstanding high-speed performance.

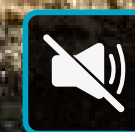

- **Reinforced Sidewall structure**

The high turn-up design of the tire enhances its sidewall strength. It makes tires more stable in handling and ensures driving safety on complex and diverse road surfaces.

- **Low level of noise**

The slightly asymmetrical tread groove and the rationalized design of grooves provide excellent quiet comfort for driving and riding.

The knurling decoration design at the bottom of the tread groove not only brings aesthetic appearance but also reduces noise.

PERFORMANCE RATINGS

- **Advantages of Tread Groove and Shoulder Step Designs**
The stepped design of the tread groove prevents stones from getting caught when driving on country roads. The decorative 3D step design on the shoulder is beautiful and heat-dissipating.
 - **Tread Groove Designs for Excellent Drainage and Hydroplaning Prevention**
Evenly spaced tread grooves combined with a transverse tread groove design ensure excellent drainage and prevent hydroplaning.
 - **Excellent driving performance and quiet comfort**
The tread groove design is optimized for excellent driving performance and quiet comfort.
 - **Tread Groove Designs for Excellent Traction**
The tread groove design is optimized for excellent traction.
 - **An optimized tread pattern for traction makes your driving full of fun..**

The stepped design of the tread groove prevents stones from getting caught when driving on country roads. The decorative 3D step design on the shoulder is beautiful and heat-dissipating

- **Tread Groove Designs for Excellent Drainage and Hydroplaning Prevention**

Four main tread grooves combined with transverse tread grooves to provide excellent drainage performance to ensure driving safety in heavy rain;

The design of curved fine grooves greatly reduces the water film between the road surface and the tire on rainy days, preventing the occurrence of hydroplaning

PERFORMANCE RATINGS

- 
- **The high-strength structure can adapt to various load-bearing requirements**
 - **High-speed stability and maneuverability**
The design of three straight grooves and closed middle shoulder enhance tire strength while greatly reducing tire noise, meeting the low noise requirements of high-end light passenger vehicles;
 - **Special exterior design**
The "lightning-shaped" decorative design on the sidewall makes the appearance of the tire beautiful and unique.
 - **Excellent driving stability and handling performance**
The design of continuous tread block on shoulder provides excellent driving stability and handling performance for vehicles under high load conditions;

- Optimize the performance of 4WD drive

- Unique Tiger-Tooth-Shaped Tread Blocks

The unique tiger-tooth-shaped three-dimensional tread blocks can provide excellent traction and high passability on mountain roads, muddy terrains and snowy surfaces alike. They make your vehicle stand out and be more recognizable.

- Outstanding all-terrain driving capabilities

- Advantages of Wider Tire Surface and Shoulder Design

The wider tire surface makes the tire stronger and more three-dimensional. The progressive thickening design on the tire shoulder ensures that the vehicle has lateral support. And the solid white and black letters highlight the quality of the tire even more.

PERFORMANCE RATINGS

OFF-ROAD TRACTION:  9

TREAD LIFE:  7

DRY HANDLING:  7

RIDE COMFORT:  6

- Good at vehicle recovery in various tough terrains
- Outstanding performance, with a focus on off-road driving.
- Reinforced structure, stronger adaptability and better vehicle recovery ability
- Challenge harsh road conditions more confidently and enhance the driving pleasure

The optimized combination design of huge tread blocks and grooves provides excellent driving force, grip and anti-skid performance on unpaved roads; Double-layer reinforced belt and special three-layer reinforced carcass design greatly improve the overall strength of the tire and meet the requirements of the worst road conditions

The design of shoulder groove special protective dam and rough shoulder reinforcement improve the anti-impact ability, thereby greatly improving the durability; The design of single-wound hexagonal bead greatly improves the durability and stability of the tire bead.

PERFORMANCE RATINGS

- Improvements in excellent formulations and structures

Excellent all-weather performance throughout the year;
Asymmetric pattern design ensures dry and wet ground and
cornering handling performance.

All-season TIRE

PERFORMANCE RATINGS

The tread's fine 3D ultra-thin groove design improves grip while ensuring excellent handling and driving performance on ice and snow.

More horizontal and multiple pattern grooves intersect, which can fully absorb moisture and avoid the formation of water film. At the same time, they can effectively wrap and form snow columns to improve snow removal performance. The low-temperature resistant mixed soft rubber formula for the tread has strong grip on snow and ice surfaces, which can ensure excellent handling performance.

PERFORMANCE RATINGS

- The low-temperature resistant mixed soft rubber formula of the tread enables the tire to remain soft in cold weather. It effectively improves the grip on ice and snow roads and ensures excellent handling performance

BRAND MEANINGS

LYKEEN,

DERIVED FROM THE NORWEGIAN WORD "LYKKE"
SIGNIFYING JOY, HAPPINESS, AND ENTHUSIASM,

is more than just a tire brand; it's a promise of an elevated driving experience.

“ LYKKE ”

IN THE WORLD OF LYKEEN,

we believe that every journey should be filled with the same exuberance as the meaning behind our name. Our passenger car tires are meticulously crafted to not only ensure a smooth and safe ride but also to infuse a sense of delight into every drive. The superior grip and stability our tires offer are designed to give you the confidence to embrace the open road with enthusiasm, knowing that you're supported by a product that values your happiness.

WE SINCERELY HOPE THAT

the entire humanity will be filled with peace and hope, and be more motivated to pursue a better and freer life. Let go of the constraints and embrace various challenges.
